EXAMINER

NGUYEN, CUONG H

ART UNIT	PAPER NUMBER
----------	--------------

3661

DATE MAILED: 02/13/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

<b>Office Action Summary</b>	<b>Application No.</b> 10/771,798	<b>Applicant(s)</b> JONES ET AL	
	<b>Examiner</b> CUONG H. NGUYEN	<b>Art Unit</b> 3661	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 12/12/05 (vacating prior Action by SPE).
- 2a) ☐ This action is FINAL.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1-31 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-31 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 04 February 2004 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.  
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All    b) ☐ Some \*    c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.

***DETAILED ACTION***

1. This Office Action is the answer to the Interview on 5/16/2005 between examiner Hernandez and the applicant's representative), which paper has been placed of record in the file.

***Drawings***

2. 5 sheets of formal drawings were accepted by the examiner.

***Response to Arguments***

3. The current examiner agrees with the previous examiner's cited prior art because they are of similar subject matter with pending claims. According to Ms. Olga Hernandez, previous Final Office Action is withdrawn, and the response from applicant submitted on 1/31/2005 must be considered as the latest one; accordingly, its content is examined herein.

A. As to claim 7, Applicant argues that Bellesfield et al. do not teach a solution set including an Airport – this merely a term for “a destination”/a location (such as an airport); the distance between 2 airports/locations is merely a “travel” distance (a distance/travel time is taken into account); and a fare is merely a fee/cost for traveling between 2 places (e.g., these claimed information have been widely disclosed in a travel plan/package). The current examiner respectfully submits that claimed “a solution set” comprises those information (knowing that these pending claims are merely directed to displaying information electronically, such as on a computer screen).

B. Bellesfield et al. suggest about displaying “a solution set” with a destination and/or point of interest (between a departure place and a destination place – such as airports) to distribute a travel plan/package (see also DeLorme et al., the abstract). A user

selects, via the user interface, a departure point and a destination point, the routing component employs the routing database to generate and display a route between the selected departure and destination points. Based on selected criteria by a user (destination/airport), a package/solution set which is a travel route generated by Bellesfield includes the airport, which is the destination and/or point of interest. Using Bellesfield's invention, and entering as a location/destination (a city/an airport) would provide a route to requested destination/airport/city, which is "a solution set". One of ordinary skilled in the art use cited inventions to enter/input an airport as a destination city to obtain an automated travel planning from the starting/departure point to a destination, including corresponding distances, and related costs.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

**4. Claims 1, 7-9, 14, 16, 17, 22-24, and 27-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bellesfield et al. (US Pat. 6,498,982), in view of DeLorme et al. (US Pat. 5,948,040).**

A. As per claims 1, 7-9, 14 and 22, Bellesfield et al. suggest steps/components of:

- receiving/providing a specific information request according to a user (e.g., a user inputs/enters travel information - see Bellesfield et al., Figs. 1, 2, 9, 10 and 11);

- processing information request to initiate an inquiry, and collecting responses from a server, which gathers information from a remote server, to determine a solution set to the information request (e.g., USER INTERFACE 14 sends inputs to box 38 to process (box 26, 30, and 34) can be remote servers; obtained solutions are displayed on MONITOR 18 – see Bellesfield et al., Fig. 2);
- rendering that “solution set” in an electronic map for transmission to a user (see Bellesfield et al., Fig. 2 – displaying MAP SELECTION 42, ROUTING 46: a travel distance for fee calculation, and PLACES OF INTEREST 34 – such as airport locations);

Bellesfield does not explicitly disclose that “solution set” including an airport/city, a travel fee, and a traveling distance.

However, DeLorme suggests that travel “solution set”/package (see DeLorme, the abstract – according DeLorme’s invention: WHERE? – airport/city/point-of-interest, WHAT? - airplane, WHEN? and HOW? and time and cost of that corresponding travel).

It would have been obvious to one skilled in the art at the time of invention to include an airport in Bellesfield's invention as DeLorme’s suggestion of WHAT? WHERE? in order to get a travel plan and using it as a destination/point of interest; for the advantage of linking different digital computers with database in servers via a modem for remote accessibility (this output of that process may be a map/ticket combination with machine readable encoded ticket and reservation information. The output may also include travel materials such as airline tickets, POI displays, hotels, restaurant coupons,

and tickets. The process also accomplishes linking and electronic data transfer between involved digital computers, a PDA, or a GPS receiver).

B. As per claims 2, and 10, Bellesfield teaches about receiving travel data from one server for use on a computer system (see Bellesfield et al., Fig. 2 refs. 26, 30, and 34; col.5 lines 1-9).

C. As per claims 3, and 11, Bellesfield et al. teach that a user select a topic to input requests (see Bellesfield et al., Figs.2 where a user input a MAP SELECTION 42 for display on MONITOR 18).

D. As per claims 4, and 12, Bellesfield et al. teach about parsing inquiries for querying from data tables (see Bellesfield et al., Figs. 3, 5 and 7).

E. As per claim 6, Bellesfield et al. teach about providing results (i.e., an electronic map) to a requested user that posed the information request (see Bellesfield et al., Fig. 10 ref. 146 and Fig.11 ref. 160).

F. As per claims 5 and 13, Bellesfield et al. suggest that requested information may be supplied from a provider (see Bellesfield et al., Fig. 2 refs. 26, 28, and 34 are provided by external database from another provider).

G. As per claims 15, 25 and 26, Bellesfield teaches the request including a location of interest, and a distance to the location of interest (see Bellesfield et al., Fig. 2 refs. 26, 28, and 34 provide a PLACE OF INTEREST and ROUTING DATABASE containing corresponding distances; and the abstract).

H. As per claim 18, 20, 29 and 31, Bellesfield et al. do not explicitly disclose that accessing a database for a geocode corresponding to a destination of interest.

However, they disclose that a geocode of a related point of interest can be obtained with corresponding latitude and longitude coordinates (see Bellesfield et al., Fig. 7).

I. As per claims 19 and 30, Bellesfield teaches about accessing a database for a distance between 2 points and an associating traveled fair, (see Bellesfield et al., Fig. 2, the routing component 46 accesses routing database 30 for a distance and estimating an associating fair including an available lowest fair).

J. As per claim 21, Bellesfield et al. suggest about storing the retrieved information in a searchable database (see Bellesfield et al., col. 6 lines 52-67 – related information are organized together in a database structure and are storing in a convenient location for further use).

**5. Claims -16, 17, 23, 24, 27, and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bellesfield et al (6,498,982) in view of DeLorme et al (5,948,040).**

A. As per claims 16, 23 and 27, Bellesfield et al. do not explicitly disclose about a dollar limit as a feature of requested information.

However, DeLorme suggests that travel “solution set”/package (see DeLorme, the abstract – according DeLorme’s invention: WHERE? – airport/city/point-of-interest, WHAT? - airplane, WHEN? and HOW? are time and cost of that corresponding travel). Furthermore, DeLorme teaches a user buying tickets (see DeLorme et al., col. 14, lines 25-30 – viewing/purchasing tickets online for a trip).

Therefore, it would have been obvious to one skilled in the art at the time of invention to combine Bellesfield's invention and DeLorme’s invention to explicitly

disclose about a dollar limit as a feature of requested information for the advantage of constructing a travel package including travel distance costs requested by a user.

B. As per claims 17, 24 and 28, Bellesfield do not explicitly disclose a request having a number of travelers.

However, DeLorme et al. suggest about making reservations and buying various tickets – including a task of specifying how many travelers in that trip for a cost calculation.

Therefore, it would have been obvious to one skilled in the art at the time of invention to combine Bellesfield's invention and DeLorme's invention explicitly disclose a request having a number of travelers as a feature of travel cost calculation for the advantage of constructing a travel package including total travel costs requested by a user.

### ***Conclusion***

6. Pending claims are not patentable.

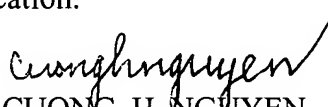

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to CUONG H. NGUYEN whose telephone number is 571-272-6759. The examiner can normally be reached on 9:30 am - 5:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, THOMAS G. BLACK can be reached on 571-272-6956. The Rightfax number for the organization where this application is assigned is 571-273-6759.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

Please provide support, with page and line numbers, for any amended or new claim in an effort to help advance prosecution; otherwise any new claim language that is introduced in an amended or new claim may be considered as new matter, especially if the Application is a Jumbo Application.
